THE MASTERED ENERGY

PRODUCT DESCRIPTION

ECOCONTACT®

Is a **multi-component metal foam** in sheets of 1.6mm of thickness. The micro points will drill through the oxide layers in order to **significantly lower the contacts resistance**, either aluminium and copper, bared or tinned.

YOUR INTERVENTION KIT

ECOCONTACT® CASE

« Industrial electrical contacts »

The **easiest** and most **efficient** solution to deal **permanently** with your bolted contacts

A range of washers and plates with cutting tools and accessories

KEY PRODUCT BENEFITS

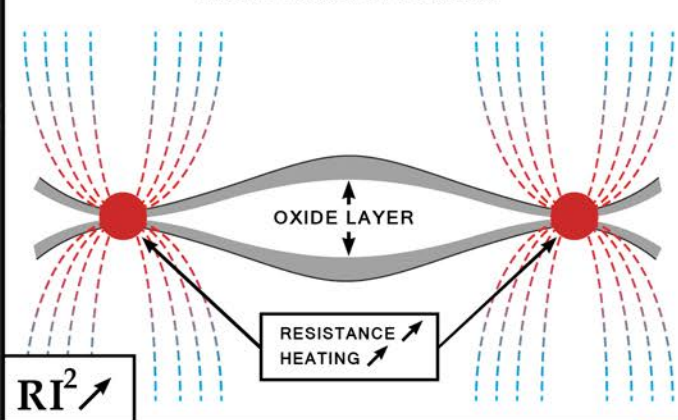

More than **80% Energy Gains**

- . No dangerous and tedious **sanding** process
- . Continuous **improvement**, even over 200°C
- . Long term **Stability**
